Trans Complexity Insertion On Inter Science Modality In Experimental National University Western Plains Ezequiel Zamora

ABSTRACT

Research rules and methodic in all university, has to adjust to a specific purpose, such that's for they have to updating that ruler tools at current day to proceed to develop an research document in different formative level, that's for borne restlessness of this scientific article, to analyze and understanding regards the trans complexity insertion on inter science modality In Experimental National University Western Plains Ezequiel Zamora, keep going the rule on Act 767 from April 2009, since the rule subscribed in 1343 Act of 2021, introduced several researching modalities, so of this institution, according with expressed in that document, this document has been doing on Social Sciences Doctorate UNELLEZ frame, that's for it's content is supported, just like Acts 767 and 1343 from the institution mentioned, and University Romulo Gallegos researching line Curriculum, Pedagogic Formation and Innovation, to concreted it, drives by documental researching and Berelson's (1953), which results identified inter science modality, is a way to produce Transcomplex research, concluding that modality updating the intellectual production by perspectives of that university.

Descriptors: Integration, Methodical, Mixed Method, Doctoral Researching Profile, UNELLEZ Rules, Transcomplexity.
