Design Of Didactic Materials, To Favor The Integral Development Of The Boys And Girls Of The Initial Education Center: "Guaranache Arriba"

ABSTRACT

This research represented its didactic value by considering as a general purpose: Develop a design of the didactic resources to favor the integral development of the children of the Initial Education Center: "Guaranache Arriba", particularly in the classroom, due to the lack of didactic materials, causing a notorious problem, by considerably affecting academic performance, in the development of daily activities, a situation that led me to carry out theoretical inquiries, including: Innova School Colombia (2022), Vargas Murillo (2017), Morales (2012), Bolivarian Curriculum 2007, UNESCO (2021), in order to achieve the development of didactic materials, and thus favor pedagogical development. It is important to highlight that this research was carried out with the methodology of participant action research and observation as a technique, allowing to identify the current situation aimed at the line of research: Resources for Learning, Technology and Innovation, in addition, supported by the legal bases contained in the Constitution of the Bolivarian Republic of Venezuela (1999), by complying with the strengthening of the national education system, applying the appropriate knowledge for the solution of this problem. Likewise, the materials that were made have allowed to favor the learning process of the students, translating their results in the conditions of appropriate quality helping the integral development of the students, showing a specific function of application between the teacher and students, including the conclusions that reveal the monitoring of the learning process of the schoolchildren, through the use of didactic materials, taking advantage of the resources of the schooled environment.

Descriptors: Designs. Didactic materials. Initial education. Integral development. Learning. Production techniques.

Biographical Review: Esp. Belkys Rojas, active teacher at the Initial Education Center: "Guaranache Arriba", Bachelor of Initial Education at the Simón Rodríguez National Experimental University. Applicant to the Master's Degree in Initial Education, from the National Experimental University of Teaching: Samuel Robinson. Teacher VI of the Ministry of Education.
